IURC APPROVES DECREASE IN FUEL CHARGE FOR VECTREN SOUTH

Today, in Cause No. 38708-FAC65, the Indiana Utility Regulatory Commission approved a change in the fuel adjustment charge for Vectren South that will bring savings to its customers.

The average customer using 1,000 kWh per month will see a decrease of \$3.31 on his or her electric bill for February, March and April.

Vectren South purchases Indiana coal as its primary fuel source to generate electricity. Evidence in this case shows that the company is making every effort to obtain available fuel or power at the lowest cost reasonably possible.

Vectren South serves more than 110,000 residential and business customers in southern Indiana.
